

EUROCOPTER

EC-135 / EC-145 / UH-72

MULTI-PURPOSE STEP MOUNT. FAA / EASA STC'D

The step mount expands the capability of both the EC-135 and EC-145 models. Available in left / right and lightweight original step replacement versions, the step mount is the most capable and cost effective method of installing all the most popular sensors on these airframes

The mount offers the following distinct features:

- 125lb payload capacity on front hardpoints, designed to accept various camera / sensor types
- 100 lbs payload capacity on aft hard points, for microwave downlinks, various flir camera's, loudspeakers and searchlights
- All aluminum tube and billet, bolt-together construction. No welds
- Easy to install, mount bolts directly to airframe. Install or remove in minutes.
- Standard and high skid compatible
- Float compatible
- Basic step weight: 25lbs
- Unobstructed view, excellent for surveillance, ENG, film work.
- Available in step only lightweight version, direct replacement for factory steps
